Greetings,

I write today to voice my opposition to the proposed Nuclear High-Level Waste Repository to be built at the Yucca Mountain Site.

First and foremost, this is Sacred Land. The magnitude of such a violation upon a people is unspeakable. The magnitude of such a violation to the Great Mother Earth is unspeakable.

Over six decades ago - SIX DECADES - scientists began creating the abomination known as nuclear energy. At that time, those same scientists were aware that in creating it, they did not have an answer to its safe disposal. In six

decades, many brilliant scientists have lived. They have attempted to solve the problem. With all the knowledge humans have amassed, still this one puzzle piece remains elusive. How does it come to be that we can reach out into the Universe and travel to the Moon, Jupiter and Mars and we have not found the solution to nuclear waste? Could it be that there is NO SOLUTION TO NUCLEAR WASTE?

The Yucca Mountain site is unstable. Brave scientists spoke out about this decades ago during the initial site selections and the U.S. Government tried to discredit their professional lives. The General Accounting Office slammed the Department of Energy for suppressing geological evidence (which they possessed) during the site selection process. The hot fissures located within Yucca Mountain will also cause erosion to the rods at a much faster rate. There is more than substantial scientific evidence to pronounce Yucca Mountain as NOT FIT FOR A REPOSITORY.

I urge you strongly to review all the evidence against using this site. I urge you to pray to whomever you believe in as Creator. I urge you to walk alone out in Nature and to LISTEN to what SHE has to say.

If you vote in favor of this proposal, you are condemning our future generations as we have already condemned many with our out-of-control science and our rape of this planet.

Sincerely,

Anam Astar

Human
